Objective

Driven and analytically strong aspiring developer with solid foundations in programming and problem-solving, seeking a Web Development Intern role with a focus on backend development using Python. Experienced in building scalable and secure web applications using Django and RESTful APIs, along with a working knowledge of databases such as MySQL. Proficient in core web technologies (HTML, CSS, JavaScript) and familiar with modern frameworks like React. Passionate about writing clean, efficient code, optimizing backend performance, and developing data-driven solutions. Eager to contribute to real-world projects, collaborate with teams, and continuously enhance technical expertise in a fast-paced development environment.

Education

MRITS , Hyderabad	Nov 2022 – April 2026
B. Tech CSE-Data Science	CGPA: 8.6

Technical skills

Programming Languages	: Python
Web Technologies	: HTML, CSS, JavaScript, React.js, Django, Tailwind CSS, Material UI.
Databases	: SQL
Tools	: VSCode, Git, GitHub, Thunder Client, Vercel, Render.

Projects:

To-Do List – Full Stack Task Management Web Application

React.js, Tailwind CSS, Django REST Framework, SQLite/MySQL, Git & GitHub

- Developed a full-stack task management application with user-friendly interface and backend integration.
- Implemented CRUD operations (Create, Read, Update, Delete) for managing daily tasks efficiently.
- Built REST APIs using Django to handle task data and ensure smooth communication with frontend.
- Designed responsive UI using Tailwind CSS for seamless experience across devices.

Expense Tracker – Personal Finance Management Web Application

React.js, Tailwind CSS, Django REST Framework, MySQL, Git & GitHub

- Built a full-stack expense tracking application to monitor and manage daily financial transactions.
- Implemented features for adding, updating, and deleting income and expense records.
- Designed backend APIs to handle transaction data and perform calculations for total balance.
- Created clean and responsive UI for better data visualization and user experience.

Weather App – Real-Time Weather Forecast Application

React.js, Tailwind CSS, Weather API (OpenWeatherMap), Git & GitHub

- Developed a responsive weather application to fetch and display real-time weather data.
- Integrated external Weather API to show temperature, humidity, and weather conditions dynamically.
- Implemented search functionality to get weather details for different cities.
- Designed a simple and interactive UI for better user engagement.

Cash Bag – Prank Interactive Web Page

HTML, CSS, JavaScript, Git & GitHub

- Created a fun and interactive prank web page to simulate a “cash reward” experience.
- Designed engaging UI with animations and user interaction elements.

- Implemented JavaScript logic to trigger surprise/prank actions dynamically.
- Focused on lightweight design and smooth frontend performance.

Certifications

- Fundamentals in cloud computing – NPTEL
 - Introduction to Internet of Things – NPTEL **Achievements & Activities**
-

- Selected for Smart India Hackathon (SIH) 2024.
- Developed IoT-based Fire-Fighting Robot for a tech exhibition.
- NSS organizing member , Class Representative

Soft Skills

- Team Collaboration and Coordination and Adaptability
- Clear and Professional Communication Skills
- Time Management and Task Prioritization
- Problem Solving and Critical Thinking
